Graduation Thesis

title *"Opinion Mining on Parliamentary Commentaries, using Machine Learning."*

supervisors Dimitris Plexousakis,
Professor of Computer Science, University of Crete

description Developed a tool that recognizes patterns on plain texts in order to extract several kind of semantic information (like arguments, suggestions, general agreement of the author) using machine learning.

Technologies used

Java Web Server: Implemented a Java Web Server in order to communicate with the Back-End system.

HTML5 - **Javasrcipt:** Developed a simple GUI in order to let the user send raw texts for analysis.

MySQL: Implemented a MySQL Database in order to store the output of the data mining process.

Elasticsearch: Elasticsearch used in order to create an index, which used for the mining process. Especially to use TF-IDF an perform complex queries to the index.

WEKA Framework: Used to apply several machine learning algorithms.
